AUTOMATED WORKFORCE MANAGEMENT

Participative web application to optimize operations and rightsize staff

Digital solution that helps save enormous amount of time with administration and invoicing when linked to personnel and salary systems, time registration and invoice packages. The user who carries out the planning is assisted in making decisions by employing Computer Aided Scheduling. The manual coordination and communication workflow with employees can optionally be automated using modules for the web, via SMS messaging, and email.

We digitalized a solution that stands out as a highly flexible, user-friendly planning resource optimizing the employee schedule and deployment. It is built as complex modular system: Dashboard, Authorisation, Managing data, Support mechanism, Schedules, Managing scheduling data, Scheduling perspectives, Requests, Time registration, Workflow, Reports.

BENEFITS

- Avoids overstaffing, rightsizes workforce, reduces costs
- Saves time
- Flexible while being functional and reliable
- Compatible with popular devices (laptops, smartphones, tablets) regardless the operating system (Android, iOS)

DIGITAL ENTERPRISE PORTAL

Enterprise collaborative platform for efficient team work

Plays an active role for distributed team of hundreds of members to manage business content. It unifies team work and provides one-stop access to essential documentation, functionality and services all together connected in specific business processes.

The digital platform implemented addresses specific flows: simplified collaboration by storing, sync-ing, and sharing files online | responsive experience from any device with web or mobile access | chat-based workspace for teams | team sites for easy web communication with public audience | work management for team to create new plans, organize and assign tasks, share files, chat get updates on their progress | e-learning for knowledge transfer.

BENEFITS

- Collaboration anytime, anywhere
- Flexibility in attending team meeting or responding to assigned tasks
- Easy communication
- Privacy and security

MODERN USER EXPERIENCE

Enhanced recruitment with smart web platform

We responded to our customer's vision of digitalizing their online recruitment platform without removing the human touch.

Business process web platform we made it easy to handle by public users and internal users. It includes: modern Internet portal for guests and registered users to take advantage of features such as registering, own resume management and secure candidate browsing

Intranet portal, providing means for managing resumes, jobs, users, candidates' and employers' master data, together with functionality for matching resumes to jobs.

BENEFITS

- Unique point of access to the candidate resumes database
- New customer engagement channels
- Full and direct engagement with both the candidates and the customers (employing companies)
- Strong and unique consultant-to-customer relation
