PRESS RELEASE

Wittmann&Partner challenges IT students from Sibiu to research

On the 19th of May, **Wittmann&Partner** will take part in the event **Studenti și Tehnologii pentru Companii (Students and Technologies for companies)**, which celebrates 20 years of education in computer science and engineering in Sibiu. The event will take place at the Hermann Oberth Engineering Faculty's headquarters.

Wittmann&Partner will disseminate information regarding software research projects as strategic vector in the development of the company.

Ciprian Cîndea, General Manager, will sustain a presentation with the theme **"Wittmann&Partner in the context of research and development projects"**. In the framework of the same event, the company will finance the second prize of the **Student Contest** of computer science and engineering projects.

Wittmann&Partner announces the opportunity offered to students to be actively involved in research projects, accumulating knowledge and experience and being paid for their work. Their research activity may also constitute the theme of a scientific paper. We are waiting for the CVs of the interested students at research@wittmann-partner.ro.

Research opportunities for students in 2006

DiFac (Digital Factory for Human – Oriented Production System) has the purpose to develop a new CME (Collaborative Manufacturing Environment) for the next generation of digital manufacturing.

Robocup (The Robot World Cup Initiative) is an international project for research and innovation in artificial intelligence and robotics.
