

ADETIM – improved activity with iDocument

“With Ropardo, we achieved the expected results in the forecasted time and costs, which are important aspects for a public institution.”

Solutions

Technologies:
 Linux, Domino Server,
 Lotus Notes, HTML, CSS, PHP

Challenge

The project arose from the need to develop a database for Timis district, which was to ensure the promotion and information function of the entire district and, at the same time, to create a specialized database, which was to exploit the offers of fields and buildings in Timis.

These needs came about with the great demand of data and information in the activity of communication, consultancy and committal of the foreign investors interested in business opportunities in Timis.

About ADETIM

ADETIM - The Agency for Economic and Social Development Timis is a non-profit public institution, under Timis District Council, with judicial personality, and entirely auto-financed from extra-budget income. Its role is to identify the problems which prevent the local economic growth, in order to design new plans and solutions in view of social and economic development. At the same time, ADETIM has the responsibility to promote the business opportunities of the district in order to accomplish the marketing process.

Solution by Ropardo: iDocument

iDocument is a solution for **knowledge and document management**, which allows centralization of the information inside the organization, allowing direct access (based on access levels) to all the important information inside the organization, archived and updated. **ImoTim** is a module for online offers promotion, which allows the centralization of the information in one single database.

Our team also designed the **Real Estate module**, which includes every aspect of the project management activity and the **Workflow module**, to customize and integrate each of them in a unique solution, creating a specific solution for iDocument.

Our solution ensures:

- rapid document management
- simplified access to knowledge and information
- team work and collaboration
- data security
- reduced time and costs for internal management.

SOFTWARE CONSULTING	Requirements management System analysis Risk analysis Process management
SOFTWARE DEVELOPMENT	Architecture design Implementation
TESTING/ QUALITY	Functional testing Unit testing Automated testing Load/Performance testing Static testing
LEVEL of SERVICES	

Outsourcing to Ropardo S.R.L.:

- Quality custom software development
- End -user satisfaction
- Short time to market
- Quantifiable value
- Guaranteed performance level
- Reduced and controlled costs
- Managed risks
- Good value-for-money
- Flexibility

Approach

In order to customize the project management solution, so as to correspond to client's needs, it was necessary to elaborate an analysis of the organization and establish the specific settings according to which the software solution could be exploited most efficiently.

The project team was made of four **experienced members** chosen by their **good communication skills** and **high capacities**, as well as by their **deep knowledge** and **understanding of the domain**.

Our German partner ensured project management, organized second level testing, and acted as customer contact together with our technicians.

Ropardo team ensured the **study and reengineering process** of the existing application and **definition of requirements** and **application architecture, software development** and **testing** (quality assurance).

The necessary function was implemented in order to allow system administrators to import and maintain company address book in SAP but same contact data to be available in Domino / iDocument repository.

Benefits

- **direct access** to the important information inside the organization, based on access levels
- important information inside the organization is not lost, but **gathered**
- information is permanently **updated**
- **security** - every employee has access only to a part of the information, according to a specified hierarchy
- **control** - the system allows displaying every process inside the organization
- **integration** - the product integrates 100% with MS Office suite
- the solution allows a reliable and fast **communication**
- **optimization** of the internal processes
