Teraplast - increased productivity with iDocument

"*With Ropardo, we achieved the expected results in the forecasted time and costs.*"

Solutions	Technologies: Domino Server, Lotus Notes, HTML, CSS, J2EE/Java, SAP connectors

About Teraplast:

Built up in 1990, following the split of The Construction Materials Enterprise and integrating the terra-cotta tiles factory, Teraplast continues a tradition of 112 years in terra-cotta tiles manufacturing. Moreover, the company has an experience of 30 years in plastics processing, being now the Romanian leader in PVC extrusion.
The company has exports to the East, Central and West European markets, in countries like: Italy, France, Austria, Germany, Hungary, Slovenia, Serbia, Republic of Moldova etc.

Challenge

Teraplast has developed a sales system based on its own warehouses in the main territory and distribution is ensured by partners from all over the country, thus aiming full coverage of the internal market.

To reach its objectives Teraplast found itself in great need of data and information management which was felt in the daily activity: from assistant's manager to sales department, from Human Resource department to production department, etc.

## Solution by Ropardo : iDocument

iDocument is a solution for **knowledge and document management**, which allows centralization of the information inside the organization, allowing direct access (based on access levels) to all the important information inside the organization, archived and updated. **ImoTim** is a module for online offers promotion, which allows the centralization of the information in one single database.

Our team designed the **Real Estate module**, which includes every aspect of the project management activity and the **Workflow module**, to customize and integrate each of them in a unique solution, creating a specific solution for **iDocument**

Implementing iDocument for Teraplast meant a new experience by developing and testing the new modules of the application, but it represented, first of all, the solution needed by our partner as to benefit of an efficient project management.

Our solution means:
- rapid document management
- simplified access to knowledge and information
- team work and collaboration
- ensures data security
- reduced time and costs for internal management

SOFTWARE CONSULTING	Requirements management System analysis Risk analysis Process management
SOFTWARE DEVELOPMENT	Architecture design Implementation
TESTING/ QUALITY	Functional testing Unit testing Automated testing Load/Performance testing Static testing
LEVEL of SERVICES	

Outsourcing to Ropardo S.R.L.:

- Quality custom software development
- End -user satisfaction
- Short time to market
- Quantifiable value
- Guaranteed performance level
- Reduced and controlled costs
- Managed risks
- Good value-for-money
- Flexibility

Approach

To customize the project management solution, so as to correspond to client's needs, it was necessary to elaborate an analysis of the organization and establish the specific settings according to which the software solution could be exploited most efficiently.

The project team was made of four **experienced members** chosen by their **good communication skills** and **high capacities**, as well as by their **deep knowledge** and **understanding of the domain**.

Our German partner ensured project management, organized second level testing, and acted as customer contact together with our technicians.

Ropardo team ensured the **study and reengineering process** of the existing application and **definition of requirements**, and **application architecture, software development** and **testing** (**quality assurance**).

The necessary function was implemented in order to allow system administrators to import and maintain company address book in SAP but same contact data to be available in Domino / iDocument repository.

Benefits

- **direct access** to the important information inside the organization, based on access levels
- important information inside the organization is not lost, it is **gathered**
- information is permanently **updated**
- **security** - every employee has access only to a part of the information, according to a specified hierarchy
- **control** - the system allows displaying every process inside the organization
- **integration** - the product integrates 100% with MS Office suite
- the solution allows a reliable and fast **communication**
- **optimization** of the internal processes
